

DESCRIPTION

BeeDazzle Revitalize is considered a light peel due to its two alpha hydroxy acids, mandelic and lactic. It is the perfect treatment to deliver high quality rejuvenation to the skin without fuss or downtime by uniting refinement and recovery in one unique formula. With sensitive-friendly AHAs (mandelic and lactic) the skin will 'beeeee' in good hands with assistance in dead skin cell removal and cell turnover. The skin's texture and complexion will reap the sweet rewards with fewer side effects while leaving an improved appearance. Manuka honey has the highest antibacterial activity of all the honeys. Manuka has unique proteins that enhance immune activity and stimulate anti-inflammatory response. 'Beeeee' ready to love new skin!

BENEFITS

- Refines skin's texture and complexion.
- Supports the skin's barrier function.
- Anti-inflammatory and anti-microbial.
- Improves cell turnover and hydration.

PRESENTATION

Professional Product: 8 oz. Amber Jar

SKIN TYPE

Most skin types- not intended for ultra-sensitive skin, compromised barriers, or grades 3 & 4 acne.

PH

3.5

USAGE

Refer to the BeeDazzle Revitalize Protocols for exact usage. For professional use only.

CAUTION

Do not use on skin that is broken or cracked, sun-burned skin or those clients with cystic acne (grades III and IV). Do not use on clients who have allergies to Almonds, Milk or Honey. Product contains Alpha Hydroxy Acids (AHA). Use SPF for 2 weeks daily following application of this product and as a protective barrier. For external use only. Avoid contact with eyes. Keep out of reach of children. Please check a Physicians Desk reference to make sure there are no contraindications with medications and ingredients.

INCI INGREDIENT LIST

Aqua (Water), Mandelic Acid (L), Glycerin, Lactic Acid (L), Sodium Hydroxide, Xanthan Gum, Butylene Glycol, Honey (Mel), Mirabilis Jalapa Flower/Leaf/Stem Extract, Populus Tremuloides Bark Extract, Leuconostoc/Radish Root Ferment Filtrate, Lonicera Japonica (Honeysuckle) Flower Extract, Lonicera Caprifolium (Honeysuckle) Flower Extract, Zea Mays (Corn) Starch, Gluconolactone, Propanediol.

KEY INGREDIENTS

Mandelic Acid (L) (DL): Mandelic Acid (L), chirally correct, it is a naturally occurring form alpha hydroxyl acid (AHA) and is derived from bitter almonds. It can effectively retexture the skin but is a gentle acid that helps with acne, skin tone, skin texture, hyperpigmentation, and the effects of aging. Mandelic Acid is a powerful exfoliant that removes dead skin cells and accelerates cell turnover to help improve texture and complexion problems. It also promotes collagen production, increases skin elasticity, and reduces fine lines and wrinkles. Mandelic Acid works to inhibit melanin production and lessen hyperpigmentation, dark spots, and discoloration. For acne, this acid helps control sebum production, unclogs pores and helps reduce acne pitting and scarring. Mandelic Acid has antibacterial and anti-inflammatory effects, is less irritating on the skin than other acids, and an ideal choice for a wider range of skin conditions and types looking for an improved appearance with fewer side effects.

**KEY INGREDIENTS - *continued***

Manuka Honey (Mel): Manuka Honey (Mel) is derived and harvested by the native manuka plant and has the highest antibacterial activity of all honeys. It contains unique proteins that enhance immune activity and stimulate anti-inflammatory response. Manuka Honey treats wounds, scars, and skin infections very effectively and with accelerated recovery. It can also cure anti-fungal infections, bacterial infections, and fight against many pathogens. It gives relief from inflammation, redness, and pain to the skin. Manuka Honey also has antioxidant, humectant and protective effects and helps soften the skin and retain moisture.

Lactic Acid (L): Lactic Acid (L), chirally correct, is a naturally occurring alpha hydroxy acid (AHA) that is primarily used as an exfoliant that helps remove dead skin cells, reduces texture, clears complexion problems (such as wrinkles and uneven tone) and assisting new cell turnover. Since it also has humectant properties, it supports moisture levels, thereby protecting dehydrated skin from becoming even dryer and more brittle. Lactic Acid is used for treatments for eczema, psoriasis, and rosacea. Lactic Acid tightens, brightens the skin, and balances the microbiome for sensitive skin and acne.

Mirabilis Jalapa Extract (Four O' Clock Flower): Mirabilis Jalapa Extract (Four O' Clock Flower) is known for its anti-inflammatory properties and is used in skincare products to calm reactive skin, reducing discomfort (like sensations of pain, itching and stinging) and visible redness. It also improves skin's long-term resilience against sensitivity triggers and protects from free radical damage and environmental stressors. Mirabilis Jalapa Extract supports skin's barrier function by deeply penetrating and improving hydration levels. This extract is deeply nourishing, can be used to treat wounds and cuts, and helps to rebuild the health of the skin.
