

DESCRIPTION

The 'pinnacle of perfection' needs a permanent place in any skincare routine. Rare Retinal Serum features retinaldehyde, the latest optimal, and most biologically available form of Vitamin A. Retinaldehyde is merged with premier anti-glycation ingredients that supremely succeeds in the anti-wrinkle, anti-redness, and pro-radiance results.... minus all the negative side-effects of other retinoids, such as retinol. Visibly see the reduction in wrinkles, redness and inflammation combined with the ability to renew the tone and texture of the skin. Increased radiance and elasticity with a support system for skins collagen integrity is exactly what this Serum is prepared to do for the skin. A little skin rehab is just what the doctor ordered. Make Rare Retinal Serum part of any skin routine!

BENEFITS

- Increases collagen and elastin production.
- Increases radiance and elasticity while supporting collagen integrity.
- Reduces wrinkles, redness, and inflammation.
- Reduces glycation and renews tone and texture.

PRESENTATION

Retail: 1 oz. Airless Pump Bottle

SKIN TYPE

All Skin Types (except broken or cracked skin, or ultra-sensitive skin)

PH

4.5

USAGE

Apply Rare Retinal Serum to clean skin nightly. Ultra-sensitive skin may be able to use 2-3 times weekly. Always apply sunscreen when using this product to provide a protective barrier.

CAUTION

Do not use on skin that is broken or cracked. This product contains a Retinoid, so sensitivity to the sun may occur, use sunscreen daily. Do not use clients undergoing medical treatment or those who are pregnant or breast feeding. For external use only. Avoid contact with eyes. Keep out of reach of children. Please check a Physicians Desk reference to make sure there are no contraindications with medications and ingredients.

INCI INGREDIENT LIST

Aloe Barbadensis Leaf Juice*, Aqua (Water), Niacinamide, Glycerin* , Cyclodextrin, Albizia Julibrissin Bark Extract, Pentylene Glycol, Gluconolactone, Retinal (Retinaldehyde), Globularia Cordifolia Callus Culture Extract, Carnosine (L) Benfotiamine, Carnitine (L), Rubus Chamaemorus (Cloud Berry) Seed Oil, Helianthus Annuus (Sunflower) Seed Oil*, Bisabolol (L-alpha), Tocopherol (D-alpha), Tocotrienols, Elaeis Guineensis (Palm) Oil, Lonicera Japonica (Honeysuckle) Flower Extract, Lonicera Caprifolium (Honeysuckle) Flower Extract, Polysorbate 20, Xanthan Gum, Sodium Benzoate. *organic

KEY INGREDIENTS

Retinal (Retinaldehyde): Retinaldehyde is a Vitamin A derivative (the closest to Retinoic Acid) known for its anti-aging benefits and is less irritating than other retinoids. Some of the benefits of Retinaldehyde include promoting skin cell turnover, improving skin tone, unclogging pores, thickening the dermis to slow down the formation of wrinkles, reducing hyperpigmentation and stimulating collagen production. It is more suitable for sensitive skin and causes less irritation compared to its counterparts. The molecular size usually penetrates more quickly and deeply absorbs into the skin.

Carnosine Benfotiamine (L): Carnosine Benfotiamine (L), chirally correct, is a natural component found in skin tissues and is a synthetic derivative of thiamine (Vitamin B1) that has been shown to have antioxidant properties and can help reduce inflammation. It acts as an antioxidant, scavenges free radicals responsible for causing oxidative stress, preventing premature wrinkles and fine lines. Carnosine opposes the pro-aging glycation effect by breaking down those products and reversing the stiffening process, delaying the aging process. Other carnosine skin benefits include increasing cells lifespan, accelerating wound healing, and reducing cellular damage (DNA).

Globularia Cordifolia Callus Culture (Resistem) Extract: Globularia Cordifolia Callus Culture (Resistem) Extract is a plant extract which is known as the anti-aging bodyguard due to its ability to encourage a defense system in the heart of the skin. It provides skin with the power of self-protection and self-restoration. It also promotes detoxification (maintains proteasome activity), cell lifespan extension (stimulates sirtuin-1) and tissue regeneration (helps to preserve skin stem cells). This extract is a skin conditioning super-agent with anti-inflammatory properties that offer smooth, calming, soothing, redness and environmental protection benefits.

Niacinamide: Niacinamide is a type of Vitamin B-3 that builds proteins such as keratin in the skin. It stimulates collagen synthesis, produces essential lipids, antioxidants, anti-inflammatory, improves epidermal barrier function, inhibits skin pigmentation, helps smooth fine lines, boosts micro-circulation. Niacinamide is highly effective in improving the immunity of the skin, calms redness, reduces inflammation, boosts hydration, and locks in moisture. Niacinamide helps build cells in the skin while also protecting them from environmental stresses, such as sunlight, pollution, and toxins. It can also regulate the amount of oil the sebaceous glands produce and help reduce the appearance of pore size.

Rubus Chamaemorus (Cloud Berry) Seed Oil: Rubus Chamaemorus (Cloud Berry) Seed Oil is packed with Vitamin C which is proven to brighten and energize dull complexions, creating radiant and youthful skin. Cloudberries are also rich in Vitamin E a powerful antioxidant, and UV protecting carotenoids that shields the skin from harmful free radicals, helping prevent wrinkles, dryness, and lackluster skin. Plus, cloudberry seed oil is replete with Omega-3 and Omega-6 fatty acids that not only bolster the skin's protective capabilities but also help it retain moisture and reduce fine lines. Due to this oil's anti-inflammatory, antioxidant, and anti-bacterial features it will visibly reduce redness, improve clarity, and strengthen the skin barrier. In addition, the skin will be moisturized, plumper, and have improved texture and elasticity.

Albizia Julibrissin Bark Extract (Persian Silk Tree): Albizia Julibrissin Bark Extract (Persian Silk Tree) is a natural antiglycation phenomenal ingredient that has antioxidant, anti-aging, and immune-stimulating properties. Silk Tree Extract also protects extracellular matrix components, primarily collagen, from glycation showing a significant anti-aging effect. Albizia Julibrissin boosts cell energy, revitalizes tired skin, supports the skin's natural detoxification process, reduces dark circles while renewing and rejuvenating the skin.
