

DESCRIPTION

An easy, effective, one-stop shop for the skin that restores and hydrates like a serum should. Soothe Essence Serum repairs skin damage by fighting inflammation, reducing redness, and supporting the skin's barrier function. A soothing and hydrating serum that uses a chirally-correct form of Hyaluronic Acid that plumps thirsty skin and provides maximum hydration. By boosting moisture levels, it also helps to soften fine lines and wrinkles. A natural anti-inflammatory, anti-bacterial and immune stimulating serum that successfully calms reactive skin and protects against oxidative stress and inflammation. Serious serum for seriously hydrated skin.

BENEFITS

- Gently fortifies skin cells and supports barrier function.
- Softens and smooths fine lines and wrinkles.
- Soothes, restores, and hydrates the skin.
- Fights inflammation, reduces redness and repairs skin damage.

PRESENTATION

Retail: 1.7 oz. Airless Pump Bottle

SKIN TYPE

All Skin Types.

PH

3.98

USAGE

Apply Soothe Essence to clean skin as often as needed. Always apply a sunscreen product to provide a protective barrier.

CAUTION

Do not use on skin that is broken or cracked. For external use only. Avoid contact with eyes. Keep out of reach of children. Please check a Physicians Desk reference to make sure there are no contraindications with medications and ingredients.

INCI INGREDIENT LIST

Aqua (Water), Glycerin*, Polysorbate 20, Helianthus Annuus (Sunflower) Seed Oil*, Schrophularia Nodosa (Figwort) Extract, Betula Alba (Birch) Bark Extract, Propanediol, Tocopherol (D-alpha), Mirabilis Jalapa Flower/Leaf/Stem Extract, Sodium Hyaluronate (L), Squalane, Xanthum Gum, PPG-3 Benzyl Ether Myristate, Sodium Benzoate, Gluconolactone, Caprylyl Glycol, Sodium Polygamma-Glutamate. *Organic

KEY INGREDIENTS

Sodium Hyaluronate (L) (Hyaluronic Acid): Sodium Hyaluronate (L) (Hyaluronic Acid), chirally correct, is a naturally occurring glycosaminoglycan found throughout the body's connective tissue. It has been proven to moisturize the skin by attracting moisture in skin cells which reduces dryness and flaking by increasing skin hydration. It can also provide structure and volume to the skin, reducing the appearance of fine lines and wrinkles, leaving the skin plump. Sodium Hyaluronate can also reduce skin inflammation, playing a vital role in wound healing processes by promoting cell migration and proliferation. It is excellent for treating skin irritation like eczema, psoriasis and dermatitis stemming from a compromised barrier.

Mirabilis Jalapa Extract (Four O' Clock Flower): Mirabilis Jalapa Extract (Four O' Clock Flower) is known for its anti-inflammatory properties and is used in skincare products to calm reactive skin, reducing discomfort (like sensations of pain, itching and stinging) and visible redness. It also improves skin's long-term resilience against sensitivity triggers and protects from free radical damage and environmental stressors. Mirabilis Jalapa Extract supports skin's barrier function by deeply penetrating and improving hydration levels. This extract is deeply nourishing, can be used to treat wounds and cuts, and helps to rebuild the health of the skin.

**KEY INGREDIENTS - *continued***

Schrophularia Nodosa (Figwort) Extract: Schrophularia Nodosa (Figwort) Extract contains active compounds such as amino acids, flavonoids, saponins, phytosterols, fatty acids, cardiac glycoside, and asparagine. Many of these substances have been known to have a variety of health benefits including antimicrobial, antioxidant and anti-inflammatory actions. Figwort can be applied topically to help treat a range of inflammatory skin conditions, soothe skin rashes and minor lesions or wounds. It is commonly used to treat skin conditions such as eczema, psoriasis, and acne and used to alleviate swelling, itching and heal burns.

Betula Alba Bark (Birch) Extract: Betula Alba Bark (Birch) Extract functions as an astringent since the bark contains a high concentration of tannins. They work by cross-linking with proteins in the skin known as keratins, creating an invisible film that can temporarily degrease skin, tighten, and tone skin, and minimize the appearance of enlarged pores. The tannins in Betula Alba Bark Extract function as antioxidants, using their hydroxyl groups to catch free radicals and stabilize them in the phenolic ring. Birch bark also contains immune stimulation constituents to reduce inflammation, and improves skin response to stressors, while increasing hydration and reducing transepidermal water loss.
