

DESCRIPTION

Clear Future Toner is an added bonus to any blemishes and oil control routine. It's naturally formulated to clarify skin and shrink enlarged pores. It maintains skin's natural balance and comfort with probiotics. The skin will be left cleaner, refreshed and more resistant to congestion and breakouts.... aka 'Thank You Toner'. A product that puts up a defense against breakouts deserves this gratitude! This toner has anti-inflammatory, antibacterial, astringent, antifungal, and antioxidant properties; really bringing its A-game to the skin game. Go team Toner go!

BENEFITS

- Naturally clarifies skin and reduces enlarged pores.
- Contains anti-inflammatory, antibacterial, astringent, antifungal and antioxidant properties.
- Protects barrier function and provides moisture to skin.
- Assists in regulating sebum production and future breakouts.

PRESENTATION

Retail: 3.4 oz. White Pump Bottle

Professional: 6.4 oz. White Pump Bottle

SKIN TYPE

Combination, oily or acneic skin. Skin with occasional breakouts or grades I, II acne.

PH

3.6

USAGE

Shake to Activate. Apply Clear Future Toner with cotton pad to clean skin once or twice daily. Spot treat with a cotton swab or cotton pad to affected areas.

CAUTION

Do not use if skin is broken or cracked. This product contains a BHA (Beta Hydroxy Acid) that may increase skin's sensitivities to sunlight and increase the risk of sunburn. Wear an SPF daily while using this product. For external use only. Avoid contact with eyes. Keep out of reach of children. Please check a Physicians Desk reference to make sure there are no contraindications with medications and ingredients.

INCI INGREDIENT LIST

Aqua (Water), Hamamelis Virginiana (Witch Hazel) Water, Alcohol Denat., Glycerin*, Butylene Glycol, Gluconolactone, Fomes Officinalis (Mushroom) Extract, Alcohol, Salicylic Acid, Yogurt, Yogurt Powder, Palmitoyl Tripeptide-8, Syringa Vulgaris (Lilac) Leaf Cell Culture Extract, Cucumis Sativus (Cucumber) Fruit Extract, Malva Sylvestris (Mallow) Flower Extract, Acidophilus/Grape Ferment, Sodium Benzoate, Trisodium Ethylenediamine Disuccinate, Dextran, Sodium Hydroxide, O-cymen-5-OL, Maltodextrin, Montmorillonite, Citric Acid. *organic

KEY INGREDIENTS

Salicylic Acid: Salicylic Acid is a Beta Hydroxy Acid (BHA) that is commonly used in skincare products to treat acne and other skin conditions. It is derived from willow bark and belongs to a class of ingredients called salicylates. Salicylic Acid is an oil-soluble acid that penetrates deep into the pores where it binds to oil and clears congestion. It unclogs pores, reduces inflammation, even sebum production and prevents future break outs. Salicylic Acid has exfoliating, keratolytic, and anti-inflammatory properties. Salicylic Acid helps to exfoliate the skin by breaking and removing dead skin cells and revealing brighter, smoother skin. Treating skin with Salicylic Acid can help reduce bumpiness, fade dark spots, reduce skin blemishes, dry out oily skin, treat keratosis pilaris, and provide skin-smoothing effects.

Palmitoyl Tripeptide-8 (Neutrogen): Palmitoyl Tripeptide-8 (Neutrogen) is a peptide that helps to both prevent and soothe inflammation in irritated skin. It improves the resiliency of sensitive skin and helps reduce redness that can often occur in those with sensitivities. It also helps build a higher sensitivity threshold in sensitive skin and balances stressed skin. Palmitoyl Tripeptide-8 is known to reduce irritation caused by exposure to UV rays and reduce immune reactions due to internal or external stress. It also controls inflammatory cytokines released in the skin to help reduce swelling, giving a soothing and calming effect on the skin.

**KEY INGREDIENTS - continued**

Malva Sylvestris (Mallow) Flower Extract: Malva Sylvestris (Mallow) Flower Extract is best known in skincare for its ability to soothe dry, rough skin. The extract has a high content of mucilage which helps skin tissue to retain water and create a protective layer that both hydrates and soothes the skin. When applied on the skin, it induces an exfoliating effect, and the dead skin cells layer easily gets detached because of the astringent action of the tannins. It can exert both the effects soothing and exfoliating at the same time.

Syringa Vulgaris (Lilac Stem Cells): Syringa Vulgaris (Lilac Stem Cells) is a plant stem cell extract that is used in the treatment of commonly seen inflammatory, acneic, aging, and photodamaged skin conditions. By decreasing inflammation, it has been shown to boost skin's natural defense system, treat lesions or wounds, and calm irritations. It also helps to regulate sebum and has antifungal and anti-inflammatory properties. Lilac stem cells offer complete treatment for oily skin and acne disorders. It also provides hydration, reduces transdermal water loss, and locks in moisture. It also has superior antioxidant protection, and pigment-inhibiting capabilities.
