

DESCRIPTION

The Charcoal Clarifying Mask deeply cleanses, exfoliates, and purifies acne-prone or oily skin. This mask contains a unique AHA complex, packed with nutrients and antioxidants to clear skin and improve tone and texture. It effectively removes impurities, controls breakouts, and balances oil production. The Charcoal Clarifying mask helps to alleviate skin irritations while supporting cell repair and function. This mask brightens the complexion, minimizes scarring, fades pigmentation, and promotes skin healing and hydration.

BENEFITS

- Removes deep impurities, unclogs pores and intensely detoxifies the skin.
- Balances oil production, reducing break outs and lessens atopic skin flare ups.
- Helps to prevent skin infections, accelerates wound healing and improves skin recovery.
- Fades pigmentation, PIE, PIH minimizes topical scarring, and improves uneven skin tones and texture.
- Alleviates irritations, boosts skin hydration and moisture levels and proper cell function.

PRESENTATION

Retail: 3 oz. White Jar with Spatula

Professional: 8 oz. Amber Jar

SKIN TYPE

All Skin Types: especially Acneic and Oily Skin Types

PH

5.9

USAGE

PROFESSIONAL: Apply Charcoal Clarifying Mask liberally over cleansed skin, perform desired modalities, and remove residual product. Always apply sunscreen to provide a protective barrier.

RETAIL: Cleanse skin on face, neck and decollete. Apply 1 TSP of mask to face, neck and decollete, avoiding the eye area. Leave on 7 to 10 minutes. Remove with warm towel or cool water. Continue with skin regimen. When using in the daytime, always apply sunscreen.

CAUTION

Do not use if skin is broken or cracked. This product contains an AHA (Alpha Hydroxy Acid) and a form of Vitamin A that may increase skin's sensitivities to sunlight and increase the risk of sunburn. Wear an SPF daily while using this product. Natural fragrance of Black Currant may irritate the skin and may not appeal to specific clients. For external use only. Avoid contact with eyes. Keep out of reach of children. Please check a Physicians Desk reference to make sure there are no contraindications with medications and ingredients.

INCI INGREDIENT LIST

Water/Aqua/ Eau, Stearic Acid, Glycerin, Propanediol, Glyceryl Stearate SE, Rubus Chamaemorus (Cloudberry) Seed Oil, Gluconolactone, Magnesium Aluminum Silicate, Sorbus Aucuparia (Rowanberry) Seed Oil, Xanthan Gum, Lecithin, Sclerotium Gum, Pullulan, Opuntia Ficus-Indica Fruit Extract, Saccharomyces Cerevisiae Extract, Vaccinium Vitis-Idaea (Lingonberry) Seed Oil, Ribes Nigrum (Black Currant) Seed Oil, Lactic Acid, Tartaric Acid, Citric Acid, Glucose, Sodium Hyaluronate, Acetyl Heptapeptide-4, Psoralea Corylifolia (Bakuchiol) Seed Extract, Carbon (Activated Charcoal), Arctostaphylos Uva Ursi Leaf (Bearberry) Extract, Citrus Limon (Lemon) Peel Oil, Acer Saccharum (Sugar Maple) Extract, Rosa Gallica Flower Extract, Citrullus Lanatus (Watermelon) Fruit Extract, Cucumis Melo Cantalupensis (Honeydew) Fruit Extract, Cucumis Melo (Cantaloupe) Melon Fruit Extract, Prunus Serrulata (Cherry Blossom) Flower Extract, Citrus Junos (Yuzu) Seed Extract, Melaleuca Alternifolia (Tea Tree) Leaf Extract, Myrica Cerifera (Bayberry) Fruit Wax, Caprylyl Glycol, Xylitylglucoside, Anhydroxylitol, Phenethyl Alcohol, Pentylene Glycol, Xylitol, Coco Glucoside, Sodium Hydroxide.

KEY INGREDIENTS

Alpha Hydroxy Acid Complex (lactic, tartaric, citric Glucose, Citrus Limon (Lemon) Peel Oil, Acer Saccharum (Sugar Maple) extract): AHAs help remove the top layer of dead skin cells, revealing fresh new cells underneath. This leads to smoother, brighter skin. AHAs stimulate collagen and elastin production, which are essential for skin structure and elasticity. This process promotes cell turnover and reduces the appearance of fine lines and wrinkles. AHAs can fade sunspots and reduce other signs of sun damage. They also help reduce dryness by improving the skin's ability to retain moisture. AHA's are effective at preventing clogged pores, blemishes and prevent break outs. Regular use of AHAs can lead to smoother skin texture and contribute to a more youthful and radiant complexion.

Carbon (Activated Charcoal): Activated charcoal effectively cleanses the skin, unclogs pores, and removes deeper impurities and dead skin cells. It has antibacterial properties that help to prevent acne and skin infections. For those with oily or acne-prone skin, activated charcoal can help manage the overproduction of sebum. Charcoal helps balance oil production, making it beneficial for oily skin. It can mattify and promote a smoother complexion. By binding to bacteria and toxins, it may also reduce the appearance of enlarged pores. Its absorbing properties allow it to attract dirt, toxins, heavy metals, and chemicals, effectively detoxifying the skin. Additionally, it helps with exfoliation due to its gritty texture and helps improve the texture and appearance of the skin.

Sorbus Aucuparia (Rowanberry) Seed Oil: Rowanberries are rich in natural antioxidants, including flavonoids like quercetin. These antioxidants help prevent cellular damage caused by free radicals, reducing the risk of chronic inflammatory conditions. The abundant vitamin C content in Rowan berries supports collagen synthesis and helps prevent premature aging due to UV radiation exposure. Pro-vitamin A carotenoids and other antioxidants also assist with anti-aging effects as well as initiates and supports reparative processes at cellular level. Rowan berries accelerate wound closure and skin recovery. Their collagen-boosting properties aid in minimizing scars and promoting cell regeneration. Rowan berries can be beneficial for managing inflammatory skin conditions like eczema, rosacea, and psoriasis.

Psoralea Corylifolia (Bakuchiol) Seed Extract: Bakuchiol is a natural, plant-derived ingredient that is a gentler alternative to retinol for those with sensitivities. Unlike retinoids, bakuchiol is generally less irritating and carries fewer side effects like redness or flaking. Bakuchiol stimulates skin cell turnover, helping to reduce fine lines and wrinkles. When applied topically, bakuchiol exfoliates the skin, promoting collagen production and improving texture and tone. Bakuchiol may be effective in reducing hyperpigmentation, dark spots, and acne scars. It also provides protection from oxidative stress, improves skin laxity, and can help prevent clogged pores while providing skin renewal and rejuvenation.

Ribes Nigrum (Black Currant) Seed Oil: Black currant seed oil contains vitamins C, E, B1, B5, and B6, along with iron and manganese. These nutrients contribute to overall skin health. Thymoquinone, a phytochemical in black currant seed oil, reduces skin inflammation. Lauric acid, another component, helps combat microbial skin infections. The oil is rich in gamma-linolenic acid (GLA), an omega-6 fatty acid with anti-inflammatory effects. Black currant seed oil is a remedy for eczema (dermatitis) and calming atopic skin flare ups. It helps alleviate irritations and dry, itchy, or scaly skin, addressing deficiencies in essential fatty acids. Black Currant Seed Oil packs a powerful punch against environmental aggressors with its antioxidant prowess. Lastly, it boosts skins' moisture, and the natural healing process, increasing cell repair and function.

Citrullus Lanatus (Watermelon) Fruit Extract: Citrullus Lanatus (Watermelon) Seed Oil fatty acid profile made up of linoleic (51%), oleic (36%), stearic (5%), and palmitic acids (6%). Due to the linoleic acid, which is an omega-6 fatty acid to build up the skin's lipid barrier, it improves barrier function, and protects from environmental damage. It helps restore abnormal and inflamed skin due to acne by balancing out the oleic acid that is naturally abundant in sebum. It contains Vitamins A and E, which are powerful antioxidants that fight off free radicals caused by UV exposure. Watermelon Seed Oil is incredibly hydrating, sealing moisture in the dermis and can help reduce TEWL (Trans Epidermal Water Loss) and help skin retain moisture. Watermelon Seed Oil helps even skin tone, balance complexion and improve the skin's elasticity while improving blood circulation.
